

Information from Breckland Council regarding the Community Car Scheme.

I know that a number of you have had queries regarding the vaccination roll out and using the contingency measures that Breckland Council set up last year to support schemes in response to the pandemic. Our contingency measures were not designed with the vaccine roll out in mind and as such are not the main route for supporting residents needing to attend a vaccination appointment. Therefore we ask that you use the following routes that have been agreed across the county.

- Please be aware that this is first and foremost a Health process and as such, residents should be arranging their own transport or seeking assistance from their GP upon booking the appointment.
- If a resident has unsuccessfully explored this route then they can access Transport Plus, a chargeable service run by NCC: <https://www.norfolk.gov.uk/roads-and-transport/public-transport/transport-plus>

For any non-vaccine related journeys that your scheme is unable to deliver please continue to use our contingency measures, providing us with as much notice as possible and sending your completed form to community@breckland.gov.uk

Kind regards

Stevie
